

Temporary Floor Graphics

Very easy to apply! Makes a strong visual impact.

Used within shopping centres, retail outlets or exhibitions our high quality floor graphics are perfect for providing directional signage or advertising a product or a promotion.

Product Specification

- 200 micron, white, monomeric soft-PVC film
- Resistant to a large number of detergents & solvents
- Dot adhesive enables easy application and prevents air bubbles
- Designed for short term, indoor use (graphics should retain optimum print quality for up to 3 months)
- Ideal for full colour graphics or images
- Recommended for application on smooth floor coverings
- Slip resistance certified in accordance with DIN 51130
- Low flammability (classified as B-s1 according to EN 13501-1 when printed with UV-curable inks)
- Available in sizes up to 30m x 1.55m

Please note that all specifications are given as reference as it is impossible to test every possible application. We are happy to offer free printed material samples and we recommend that our customers assess the material suitability themselves.

Temporary Floor Graphics

When to use this product (Checklist)

This innovative film is best suited to usage where:

- A high impact floor graphic is required
- You only require temporary graphics
- The floor will require cleaning whilst the graphic is in place
